## Breaking the Barriers – ACS bags a 150 Cr Order

### Implementation of Remotely Monitored Intelligent Traffic Update Display System (RMITUDS) for the District of Udupi

We are proud to announce that ACS has signed a contract for about Rs 150 Crores to implement the End-to-end RMITUDS project in the Udupi region of Karnataka State.

The work includes setting up of Integrated / Intelligent Traffic Display System with Electronic Display Boards, Intelligent Traffic Signals, CCTVs with Smart Software for all major towns/cities and highways in Udupi District with Automatic Number Plate Recognition (ANPR), Detection of Traffic Violations, Safety for people crossing on Pedestrians Zebra Crossings and busy Traffic Intersections Remote Monitoring.

The project will be implemented in a phased manner. After our previous Safe City Projects of Hyderabad and Visakhapatnam cities, this is a path-breaking order for a Smart City and District and opens opportunities for taking on large contracts for similar Smart Solutions across India.

The project value is likely to be increased significantly to include the setting up of an Integrated Command and Control Centre, including a Data Centre, Networking and Video walls and Workstations for Real-Time monitoring of Traffic and safety and AMC for the next 15 years.

### Pan India Expansion

With the above order, ACS will set up Operations Offices in Bengaluru and Udupi. In addition, Sales Offices are being established in 5 more Cities in India, in sync with our plans to expand to a Pan India presence followed by Global Operations.

### Large order with Indian Navy in final stages of a favourable conclusion

An order with the Indian Navy for end-to-end IT Infrastructure and Security Solution implementation for one of their most critical green field projects in Andhra Pradesh. More about this in the following newsletter...
