Many More...

Digital Transformation for Excellence in Health Care

ACS is a Technology Partner of APOLLO and we are Proud to say that our AI based IntelliQMS software is powering Apollo in attaining superior customer Experience across its clinics and Hospitals.

ACS AI based IQMS software is powering customer satisfaction PAN INDIA

As we have embarked on 2nd quarter of current financial year, we hold substantial existing orders under execution and are looking towards a strong basket of Opportunity.

Highlights:

- SaaS based Smart HelpDesk software under development and beta will be rolled out to internal users and friendly customers for their IT/Business Infra Support Services Management through a Smart Ticketing and Resolution System. The System is designed to hook up every Business Function of an organization into a Common Services Delivery Platform with Automation, SLA monitoring, and Performance Metrics.
- Mr. Manikanta K joined our IoT and Smart Systems Vertical as a VP-Business Development. He has decades of proven experience in Digital Systems and specifically Sensor and IoT Product Markets.
- Sales team augmentation going on for Southern Region. This will be followed up with setting bases in key cities in northern India.

Our IMS Team is pursuing a large project for Agri Market Zones for a State Government and is in advanced stages. Project encompasses bring Digital Transformation through IoT and Sustainable Energy, Security and Knowledge Infrastructure to benefit lakhs of farmers. More about that in coming News Letters!

**Let's work towards building a Great Customer
